

Application No.: 10/717330

Docket No.: TOW-050

AMENDMENTS TO THE SPECIFICATION

On page 18, please replace the paragraph starting at line 22 with the following:

In this manner, the fuel cells start power generation successively. After a predetermined time has passed, a coolant is circulated through the fuel cell stack 80. After all of the fuel cells 82a through 82n are warmed up, the fuel cell stack 80 is connected to the rotational load 64 for driving the rotational ~~road-load~~ 64. Power generation in the fuel cells 82a through 82n is selectively carried out using the power generation circuit 54 of the first embodiment.
